EDUCATION

Auburn University

CSCI in Computer Science and Software Engineering

Expected Graduation: May 2026

GPA: 3.50

Skills

PROGRAMMING LANGUAGES: Java, Python, C++

FRAMEWORKS/TOOLS: Git, Linux, VS Code, TensorFlow, Scikit-learn

ENGINEERING KNOWLEDGE: Machine Learning, Artificial Intelligence, Data Analysis, Software Development

WORK EXPERIENCE

STEM Educator & Mentor

Auburn, AL / November 2023 - November 2024

Tutor

- Provided personalized tutoring for high school students in SAT math and coding.
- Guided student research projects using Python and Java, enhancing coding proficiency.
- Assisted with homework, projects, and exam preparation.

Restaurant Crew Member

Auburn, AL / March 2022 - November 2022

Part-time Employee

- Delivered efficient customer service in a fast-paced environment.
- Managed POS system operations and processed transactions accurately.
- Collaborated with team members to improve service efficiency.

PROJECT HIGHLIGHTS

Switch-On Health & Diet Tracking App

January 2024 - Present

Individual Project

- Developed a cross-platform mobile application using Flutter to track diet, fasting, exercise, and body composition data.
- Implemented calendar-based logging for meals, memos, daily checklists, and exercise records with persistent local storage.
- Visualized body composition trends using interactive charts.
- Designed a fasting timer feature displaying start time and remaining duration in real time.
- Integrated image upload functionality allowing users to attach meal photos by date.

Tiny Language Parser

Auburn University / December 2023 - February 2024

Individual Project

- Developed a parser for the TINY programming language using Ruby.
- Implemented token recognition, error handling, and parse tree generation.
- Added Boolean extension functionality and validated multiple test cases.

Parent-Child Sleep App Backend (Fitbit OAuth Integration)

Auburn University / January 2025 - Present

Team Project

- Implemented backend support for Fitbit OAuth 2.0 Authorization Code flow.
- Built API logic to fetch Fitbit sleep data and provide normalized sleep metrics.
- Designed server-side data handling and returned structured JSON responses.
- Integrated backend endpoints with a React/TypeScript frontend.

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

Tigers4Tigers Mentoring System Project

Auburn University / March 2025 - Present

Team Member

- Participated in system planning and requirements analysis.
- Contributed to functional specifications and documentation.
- Collaborated on milestone deliverables.

Parent-Child Sleep Monitoring App Project

Auburn University / January 2025 - Present

Team Member

- Integrated sleep data from Fitbit and Samsung Health devices.
- Assisted with OAuth authorization and sleep data retrieval.
- Contributed to frontend development using React and TypeScript.
